

## The Perfect Preservation of Food

**I**N hot weather this can be accomplished in the home only by a refrigerating system which insures active circulation of constantly purified air between the ice and provision chambers of a refrigerator.

# THE BOHN SYPHON REFRIGERATOR

fulfills the requirements and maintains a temperature ten degrees lower than in any other refrigerator.

The fact that the Pullman Company and all American Railroads equip their dining cars with BOHN SYPHON REFRIGERATORS is evidence of the economy and efficiency of the method.

Send for "COLD STORAGE IN THE HOME," free. Shows how milk can be kept with onions without contamination.
